

# 1 INTRODUCTION

## Overview

An application tracking system is software for recruiters and employers to track candidates throughout the recruiting and hiring process.

An job application tracking system helps companies organize candidates for hiring and recruitment purposes. These systems allow businesses to collect information, organize prospects based on experience and skill set, and filter applicants.

## Purpose

An job application tracking system creates opportunities to automate manual processes, increase visibility into the hiring cycle for the entire recruiting team, and increase opportunities for communication throughout the candidate journey. 78% of recruiters using an job application tracking system report that it has improved the quality of the candidates they hire.

# 2 PROBLEM DEFINITION AND DESIGN THINKING

## Empathy Map

## Empathy map

Use this framework to develop a deep, shared understanding and empathy for other people. An empathy map helps describe the aspects of a user's experience, needs and pain points, to quickly understand your users' experience and mindset.

[Share template feedback](#)

### Need some inspiration?

See a finished version of this template to kickstart your work.

[Open example](#) →

## Build empathy

The information you add here should be representative of the observations and research you've done about your users.

### Says

What have we heard them say?  
What can we imagine them saying?

the tracking system allow people to easily apply for a position

source and attract qualified candidates

it gives many placement

improve efficiency and lower costs

this system also include CRM, data analytics and etc...

this system can easily access and organize

**JOB APPLICATION TRACKING SYSTEM**

posts jobs on multiple job boards

these systems allow businesses to collect information

promotes easy collaboration among the recruiting teams

if anyone can apply this system they approach to use others

they want to apply

saves time by automating mundane tasks

### Does

What behavior have we observed?  
What can we imagine them doing?

# Ideation and brainstorming map

## Brainstorm & idea prioritization

Use this template in your next brainstorming session for your team to unleash their imagination and start shaping concepts even if you're not sitting in the same room.

- 10 minutes to prepare
- 30 minutes to collaborate
- 2-30 minutes to summarize

### Before you collaborate

A little bit of preparation goes a long way with this session. Have what you need in or on for get going.

- 1. Have parking
- 2. Have a goal
- 3. Have a problem statement
- 4. Have a problem statement
- 5. Have a problem statement
- 6. Have a problem statement
- 7. Have a problem statement
- 8. Have a problem statement
- 9. Have a problem statement
- 10. Have a problem statement

### Define your problem statement

What problem are you trying to solve? Frame your problem as a clear, specific statement. You will use the focus of your brainstorm.

1. Have a problem statement

2. Have a problem statement

3. Have a problem statement

4. Have a problem statement

5. Have a problem statement

6. Have a problem statement

7. Have a problem statement

8. Have a problem statement

9. Have a problem statement

10. Have a problem statement

### Brainstorm

Write down any ideas that come to mind that address your problem statement.

1. Have a problem statement

2. Have a problem statement

3. Have a problem statement

4. Have a problem statement

5. Have a problem statement

6. Have a problem statement

7. Have a problem statement

8. Have a problem statement

9. Have a problem statement

10. Have a problem statement

### Group ideas

Take turns sharing your ideas within clustering similar or related ideas to you go. (One of the ideas may have been grouped, you will discuss a separate idea. For a more in-depth than an idea, you will go and break it up into smaller sub-groups.)

1. Have a problem statement

2. Have a problem statement

3. Have a problem statement

4. Have a problem statement

5. Have a problem statement

6. Have a problem statement

7. Have a problem statement

8. Have a problem statement

9. Have a problem statement

10. Have a problem statement

### Prioritize

Your team should all be on the same page about what's important. Using the ideas from your brainstorm, you will discuss a separate idea. For a more in-depth than an idea, you will go and break it up into smaller sub-groups.)

1. Have a problem statement

2. Have a problem statement

3. Have a problem statement

4. Have a problem statement

5. Have a problem statement

6. Have a problem statement

7. Have a problem statement

8. Have a problem statement

9. Have a problem statement

10. Have a problem statement

### After you collaborate

You can report the ideas as an image or pdf to share with members of your company, and might find it useful.

1. Have a problem statement

2. Have a problem statement

3. Have a problem statement

4. Have a problem statement

5. Have a problem statement

6. Have a problem statement

7. Have a problem statement

8. Have a problem statement

9. Have a problem statement

10. Have a problem statement

## 2 RESULT

## Data Model:

OBJECT NAME	FIELDS IN THE OBJECT

	Tab Number		Auto Number

## Activity and Screenshot

The screenshot shows the Salesforce Object Manager interface for a custom object named 'job'. The browser address bar indicates the URL: `muthurangamgovernmentarts-c-dev-ed.develop.lightning.force.com/lightning/setup/ObjectManager/0112w000003kZMP/Details/view`. The interface includes a search bar and navigation tabs for Setup, Home, and Object Manager. The left sidebar lists various configuration options under the 'Details' section, including Fields & Relationships, Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, Search Layouts, and List View Button Layout.

The main content area displays the 'Details' for the 'job' object, with fields for Description, API Name (job\_\_c), Custom (checked), Singular Label (job), Plural Label (jobs), Enable Reports (checked), Track Activities, Track Field History (checked), Deployment Status (Deployed), and Help Settings (Standard salesforce.com Help Window). Edit and Delete buttons are visible in the top right corner.

### 4 ADVANTAGES & DISADVATAGES

#### List of advantages

- Saves Time
- Seamless Searching

- Wealth of data
- Customizable screening

#### List of disadvantages

- ✓ Limit potential candidates
- ✓ Harder to integrate
- ✓ Only focuses on data/analytical information

## 5 APPLICATIONS

### Solution areas:

The intelligent application of the latest technology and techniques to address specific workflow, production and post production requirements will always increase productivity and quality while reducing costs.

Digistor's expertise lies in addressing specific application areas and bringing these skills to bear for our customers.

## 6 CONCLUSION

Applicant Tracking System for recruiters is a very effective hiring solution that most of the successful recruiters utilize. Because without it, there is a good chance that your process of moving applicants through different stages can become very difficult.

## 7 FUTURE SCOPE

✦ **Saves Time for Value Added Work**

✦ **Better Overview of Applications**

- ✦ **Flexible System for Both Employer & the Agency**
- ✦ **Easy Job Posting**
- ✦ **Improved Cost-per-Hire**
- ✦ **Improved Quality of Hire**
- ✦ **Improved Inter-Departmental Communication**
- ✦ **Promotes Collaborative Hiring**
- ✦ **Entire Recruitment Cycle Speeds Up**
- ✦ **Improved Candidate Experience...**
